**Questions Re: RFP Release: Expanding Opioid Overdose
Prevention Program Capacity in New York City**

1. Are we able to do this program at two of our clinics? One is in South Jamaica and one in Jamaica. The Jamaica location is a satellite office so although it is two locations, they operate under the same license.

Yes. Funding may be used to increase capacity for naloxone distribution at as many sites as you think feasible, so long as all sites belong to the applicant's main program.

2. We submitted a similar proposal back in February, and did not receive a response of any kind. Please advise as to whether you think it is worth us submitting another proposal.

Yes. We sincerely apologize for this oversight. All applicants for this round of funding will be provided with a response as to whether funding is awarded.
